

# BADR ELDIN MOHAMED ALAMIN

AI Video Creator | Graphic & Multimedia Designer | Video Editor

United Arab Emirates | +971 58 137 2145 | badrlooka90@gmail.com

## PROFESSIONAL PROFILE

Multidisciplinary creative professional specializing in AI-assisted video production, graphic design, video editing, photography and digital marketing content. Experienced in turning advertising ideas into complete visual pieces - from concept and image creation to editing, pacing and final delivery. Strong focus on product commercials, short-form social content and cinematic visual storytelling. Based in the UAE and open to relocation across Europe with employer-sponsored work authorization or relocation support.

## CORE SKILLS

AI Video & Generative Content

Video Editing & Short-form Advertising

Photography & Image Retouching

Graphic Design & Social Media Design

Product Commercials & Visual Storytelling

Digital Marketing Content & Creative Concepts

## SOFTWARE & TOOLS

Adobe Photoshop | Adobe Illustrator | Adobe Premiere Pro | Generative AI tools

Adobe After Effects - basic | DaVinci Resolve - basic

## PROFESSIONAL CAPABILITIES

- Develop advertising concepts and turn them into complete AI-assisted video commercials.
- Create product-focused visuals, cinematic scenes and social media content using generative AI workflows.
- Edit promotional and short-form videos in Adobe Premiere Pro with attention to pacing, sound and storytelling.
- Design marketing materials, social posts and image-based advertising in Photoshop and Illustrator.
- Combine AI-generated assets with traditional design, photography and editing workflows for final campaign content.

## SELECTED PORTFOLIO HIGHLIGHTS

**AI Product Commercials:** Cinematic product advertising combining AI-generated scenes, product-focused composition and professional video editing.

**Food & Luxury Product Advertising:** Vertical social commercials built around preparation, product reveal, close-up detail and premium visual presentation.

**AI Motion & Visual Effects Concepts:** Dynamic generative sequences designed to create shots that would be difficult or costly to produce traditionally.

**AI Character Storytelling:** Scene-based generative video work focused on character continuity, visual consistency and narrative flow.

## RELOCATION

Open to full-time opportunities across Europe. Visa sponsorship, work permit support or relocation assistance required.
